## **Laxton's Measurement Rules for Contractors' Quantities (Laxton's Ser) Tweeds**

Laxton's publishers of building price books since 1817, now publish for the first time a standard method of measurement to cover approximate or builders' quantities. In recent years there has been a move away from formally prepared bills of quantities based on current methods of measurement. The increasing popularity amongst clients for design and build contracts has accelerated this trend but until now the industry has not had the benefit of a standard method of measurement to cover this kind of work.

The first and only book of its kind, combining the authority of laxton's and Tweeds.

Leads to fewer mistakes, costs and delays.

The first standard method of measurement for builders' quantities
