Birddog: Philosophy and practice of seismic data quality supervision J.S. Roy

This book describes the methods and attributes required for the competent quality control of the data acquisition of a seismic exploration crew operating on land. Although the book is concerned mainly with exploration for oil and gas reservoirs, and all the topics that are discussed in it are centred on that target, the material is applicable to other areas of seismic exploration such as civil engineering and the search for other minerals. The book comprises the distillation of more than thirty years' experience in geophysical exploration in all its aspects and in many parts of the world. Seismic data acquisition quality supervision is one aspect of geophysical exploration which, although of great importance, has had, so far as the writer is aware, no textbook devoted to it. It is hoped that it will be of interest to anyone who is engaged, in whatever capacity, in geophysical exploration and will help them to attain their goal, which is illustrated in Fig. 1. 1. The term birddog is colloquial in the geophysical exploration industry. It is a convenient shorthand title to describe the person whose full title is, and who acts as, the data acquisition quality control supervisor on a field seismic exploration crew. The term is used also to describe the person who is the client's representative on the field crew. In practice the same person performs both functions on behalf of the client.

From reader reviews:

Norberto Brody:

As people who live in the actual modest era should be up-date about what going on or information even knowledge to make all of them keep up with the era and that is always change and advance. Some of you maybe will certainly update themselves by reading books. It is a good choice for yourself but the problems coming to you is you don't know which you should start with. This Birddog: Philosophy and practice of seismic data quality supervision is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and wish in this era.

Katherine Lee:

Reading a e-book can be one of a lot of activity that everyone in the world adores. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a publication will give you a lot of new information. When you read a publication you will get new information because book is one of several ways to share the information as well as their idea. Second, studying a book will make you more imaginative. When you reading a book especially fictional works book the author will bring you to definitely imagine the story how the character types do it anything. Third, you can share your knowledge to some others. When you read this Birddog: Philosophy and practice of seismic data quality supervision, you can tells your family, friends and also soon about yours publication. Your knowledge can inspire others, make them reading a reserve.

Jeffrey Haller:

Playing with family inside a park, coming to see the marine world or hanging out with good friends is thing that usually you could have done when you have spare time, after that why you don't try point that really opposite from that. Just one activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Birddog: Philosophy and practice of seismic data quality supervision, you could enjoy both. It is very good combination right, you still desire to miss it? What kind of hangout type is it? Oh seriously its mind hangout folks. What? Still don't understand it, oh come on its referred to as reading friends.

John Charles:

What is your hobby? Have you heard this question when you got scholars? We believe that that issue was given by teacher with their students. Many kinds of hobby, Every person has different hobby. And also you know that little person like reading or as studying become their hobby. You need to understand that reading is very important as well as book as to be the thing. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You see good news or update with regards to something by book. Many kinds of books that can you choose to use be your object. One of them are these claims Birddog: Philosophy and practice of seismic data quality supervision.
