Multiplicative Ideal Theory and Factorization Theory: Commutative and Non-commutative Perspectives (Springer Proceedings in Mathematics & Statistics)

Multiplicative Ideal Theory and Factorization Theory: Commutative and Non-commutative Perspectives (Springer Proceedings in Mathematics & Statistics)

Multiplicative Ideal Theory and Factorization Theory: Commutative and Non-commutative Perspectives (Springer Proceedings in Mathematics & Statistics)

This book consists of both expository and research articles solicited from speakers at the conference entitled "Arithmetic and Ideal Theory of Rings and Semigroups," held September 22–26, 2014 at the University of Graz, Graz, Austria. It reflects recent trends in multiplicative ideal theory and factorization theory, and brings together for the first time in one volume both commutative and non-commutative perspectives on these areas, which have their roots in number theory, commutative algebra, and algebraic geometry. Topics discussed include topological aspects in ring theory, Prüfer domains of integer-valued polynomials and their monadic submonoids, and semigroup algebras. It will be of interest to practitioners of mathematics and computer science, and researchers in multiplicative ideal theory, factorization theory, number theory, and algebraic geometry.

From reader reviews:

Deborah Green:

What do you about book? It is not important along with you? Or just adding material when you want something to explain what the ones you have problem? How about your extra time? Or are you busy person? If you don't have spare time to complete others business, it is make one feel bored faster. And you have time? What did you do? Every individual has many questions above. They should answer that question because just their can do this. It said that about book. Book is familiar in each person. Yes, it is right. Because start from on pre-school until university need this specific Multiplicative Ideal Theory and Factorization Theory: Commutative and Non-commutative Perspectives (Springer Proceedings in Mathematics & Statistics) to read.

Jennifer Tomasini:

Reading a book tends to be new life style in this era globalization. With reading you can get a lot of information that may give you benefit in your life. Using book everyone in this world may share their idea. Guides can also inspire a lot of people. Lots of author can inspire their own reader with their story as well as their experience. Not only the storyplot that share in the books. But also they write about the information about something that you need example of this. How to get the good score toefl, or how to teach your children, there are many kinds of book which exist now. The authors these days always try to improve their skill in writing, they also doing some exploration before they write on their book. One of them is this Multiplicative Ideal Theory and Factorization Theory: Commutative and Non-commutative Perspectives (Springer Proceedings in Mathematics & Statistics).

Frank Ouellette:

Do you have something that you enjoy such as book? The e-book lovers usually prefer to select book like comic, brief story and the biggest an example may be novel. Now, why not hoping Multiplicative Ideal Theory and Factorization Theory: Commutative and Non-commutative Perspectives (Springer Proceedings in Mathematics & Statistics) that give your satisfaction preference will be satisfied through reading this book. Reading behavior all over the world can be said as the way for people to know world better then how they react toward the world. It can't be said constantly that reading practice only for the geeky individual but for all of you who wants to end up being success person. So , for all you who want to start studying as your good habit, you may pick Multiplicative Ideal Theory and Factorization Theory: Commutative and Non-commutative Perspectives (Springer Proceedings in Mathematics & Statistics) become your personal starter.

Maxine Ford:

Reading a book make you to get more knowledge from that. You can take knowledge and information from your book. Book is published or printed or outlined from each source that filled update of news. In this particular modern era like currently, many ways to get information are available for you. From media social

such as newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just searching for the Multiplicative Ideal Theory and Factorization Theory: Commutative and Non-commutative Perspectives (Springer Proceedings in Mathematics & Statistics) when you essential it?
