Prospects for Resilience: Insights from New York City's Jamaica Bay Eric W. Sanderson, William D. Solecki, John R. Waldman, Adam S. Parris

Given the realities of climate change and sea-level rise, coastal cities around the world are struggling with questions of resilience. Resilience, at its core, is about desirable states of the urban social-ecological system and understanding how to sustain those states in an uncertain and tumultuous future. How do physical conditions, ecological processes, social objectives, human politics, and history shape the prospects for resilience? Most books set out “the answer.” This book sets out a process of grappling with holistic resilience from multiple perspectives, drawing on the insights and experiences of more than fifty scholars and practitioners working together to make Jamaica Bay in New York City an example for the world.

Prospects for Resilience establishes a framework for understanding resilience practice in urban watersheds. Using Jamaica Bay—the largest contiguous natural area in New York, home to millions of New Yorkers, and a hub of global air travel with John F. Kennedy International Airport—the authors demonstrate how various components of social-ecological systems interact, ranging from climatic factors to plant populations to human demographics. They also highlight essential tools for creating resilient watersheds, including monitoring and identifying system indicators; computer modeling; green infrastructure; and decision science methods. Finally, they look at the role and importance of a “boundary organization” like the new Science and Resilience Institute at Jamaica Bay in coordinating and facilitating resilience work, and consider significant research questions and prospects for the future of urban watersheds.

Prospects for Resilience sets forth an essential foundation of information and advice for researchers, urban planners, students and others who need to create more resilient cities that work with, not against, nature.

Debra Daniel:

Many people spending their moment by playing outside having friends, fun activity along with family or just watching TV all day long. You can have new activity to shell out your whole day by studying a book. Ugh, do you think reading a book can definitely hard because you have to bring the book everywhere? It fine you can have the e-book, delivering everywhere you want in your Touch screen phone. Like Prospects for Resilience: Insights from New York City's Jamaica Bay which is keeping the e-book version. So , why not try out this book? Let's see.

Kathleen Huckaby:

As a university student exactly feel bored to be able to reading. If their teacher inquired them to go to the library or even make summary for some reserve, they are complained. Just minor students that has reading's heart and soul or real their interest. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading very seriously. Any students feel that examining is not important, boring along with can't see colorful pics on there. Yeah, it is being complicated. Book is very important for you. As we know that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this Prospects for Resilience: Insights from New York City's Jamaica Bay can make you sense more interested to read.
