Christy L. Ludlow, Raymond Kent, Lincoln Gray

Measuring Voice, Speech, and Swallowing in the Clinic and Laboratory Christy L. Ludlow, Raymond Kent, Lincoln Gray

Christy L. Ludlow and Raymond D. Kent's text is a definitive reference for methods of measurement in speech-language sciences and disorders. It consists of the most up-to-date information on areas of measurement such as acoustics, aerodynamics, neurophysiology, kinematics, and functional and structural neuroimaging. As information on measurement in the field of speech-language-voice and swallowing is scattered across many disciplines, Ludlow and Kent have filled this void with their comprehensive text. Research clinicians in speech language sciences and disorders, practicing clinicians, professors, and students will all find this book to be incredibly valuable for its wide scope of information and clear approach to modern methods of measurement.
