As you gaze out over your balcony, looking at the busy city below, you might start to believe that there are very few places left in the world to use survival skills. It would be extremely naïve to think this way, as there are huge swathes of land, all over the planet that are uninhabited for many miles around.

We've built and colonized, concreted and tarmacked much of the world and we aren't likely to stop, but that does not mean that the time will never come where survival skills might mean the difference between life and death.

Any number of conceivable scenarios might occur to you at some point in your life and being prepared for them can assist you in both surviving the ordeal and damage limitation.
