Silviculture: Concepts and Applications, Third Edition Ralph D. Nyland, Laura S. Kenefic, Kimberly K. Bohn, Susan L. Stout

Silviculture: Concepts and Applications reflects a belief that all the tools of silviculture have a useful role in modern forestry. Through careful analysis and creative planning, foresters can address a wide array of commodity and nonmarket interests and opportunities while maintaining dynamic and resilient forests. A landowner's needs, circumstances, and site conditions guide a silviculturist's judgment and decision making in finding the best ways to integrate the biologic-ecologic, economic-financial, and managerial-administrative requirements at hand.

The Third Edition of this influential text provides a foundational basis for rigorous discussion of techniques. The inclusion of numerous real-world examples and balanced coverage of past and current practices broadens the concept of silviculture and the ways that managers can use it to address both traditional and emerging interests in forests. A thorough discussion of new and proven interpretations increasingly directs the attention of foresters toward the role silviculture plays in creating, maintaining, rehabilitating, and restoring forests that can sustain an expanding variety of ecosystem services.

Title of related interest also available from Waveland Press: Davis et al., *Forest Management: To Sustain Ecological, Economic, and Social Values*, Fourth Edition (ISBN 9781577664369).
