This book aims to take the reader on a journey along the intricate web of Turkish-American relations. It critically examines the process, during which the relations evolved from those of strangers into an occasionally troubled, yet resilient alliance. Through the extensive use of Turkish, American and British archival documents and numerous private paper and manuscript collections, the book examines Turkish-American relations from 1800 to 1952, starting with the earliest contacts and ending with the institutionalization of the alliance after Turkey's entry into NATO. Its purpose is to provide a better understanding of the significant issues pertaining to Turkish-American relations such as the impact of international developments on foreign policy decisions, the role of key figures and organizations in shaping the relations, the interaction of political, economic, cultural and military factors in policy formation and the importance of mutual perceptions in shaping actual relations. The analysis also situates Turkish-American relations in the larger context of diplomatic history, through an evaluation of how the United States' relations with Turkey fit into the general framework of American foreign policy and also through an examination of the conduct and changing priorities of Turkish foreign policy in this era. Such a study not only enhances our knowledge of Turkish-American relations for the period of 1800-1952, but also provides further insight into the relations during the Cold War and its aftermath.
