Paul Brydel

This book was compiled from the knowledge acquired during the engineering, design, part fabrication, and assembly of my full-function ultralight helicopter. Prior to tackling this task my only encounter with a helicopter was being airlifted out of the Atlantic Ocean during Air Force Survival Training. Every aspect of the project is included. The information is presented assuming the reader has limited helicopter background. It does however offer in depth calculations for those interested in the analytical and theoretical areas of this project. All calculations were done using Mathcad an engineering software program. Every stage involved in building the helicopter is covered in detail including - the initial investigation of helicopter history to establish starting parameters, a rigorous discussion on the theory, and a brief summary of how helicopters fly. From there it proceeds to the formal engineering process for the design and build of a functional helicopter. The book continues from that point to list the equipment purchased and a brief explanation of operational techniques to fabricate the designed parts. The material types used are also covered in depth. In the final chapters the flight testing experience is elaborated on. For the reader who would like to delve further into areas beyond the scope of this book, reference books are listed. These include such topics as advanced rotor aerodynamics, rotor planform theory, or training instruction on the various pieces of equipment required to fabricate the parts. This is not necessarily an easy read but there is much to learn and many interesting facets to explore whether just for an understanding or as an actual project to pursue further.

### **From reader reviews:**

#### **Estella Powell:**

In this 21st hundred years, people become competitive in every way. By being competitive today, people have do something to make these survives, being in the middle of often the crowded place and notice simply by surrounding. One thing that oftentimes many people have underestimated that for a while is reading. Sure, by reading a book your ability to survive improve then having chance to endure than other is high. For you personally who want to start reading a book, we give you this specific An Ultralight Helicopter Experience: The History, The Theory, The Design, The Build, The Testing book as beginning and daily reading publication. Why, because this book is more than just a book.

#### **Irene Gwyn:**

Do you one among people who can't read satisfying if the sentence chained inside the straightway, hold on guys this particular aren't like that. This An Ultralight Helicopter Experience: The History, The Theory, The Design, The Build, The Testing book is readable through you who hate the perfect word style. You will find the facts here are arrange for enjoyable reading experience without leaving also decrease the knowledge that want to offer to you. The writer of An Ultralight Helicopter Experience: The History, The Theory, The Design, The Build, The Testing content conveys objective easily to understand by many individuals. The printed and e-book are not different in the articles but it just different as it. So , do you continue to thinking An Ultralight Helicopter Experience: The History, The Theory, The Design, The Build, The Testing is not loveable to be your top record reading book?

#### **Margaret Bonner:**

On this era which is the greater individual or who has ability in doing something more are more important than other. Do you want to become one among it? It is just simple way to have that. What you must do is just spending your time not very much but quite enough to get a look at some books. One of several books in the top list in your reading list is An Ultralight Helicopter Experience: The History, The Theory, The Design, The Build, The Testing. This book which can be qualified as The Hungry Slopes can get you closer in turning out to be precious person. By looking up and review this guide you can get many advantages.

#### **Mary Fix:**

What is your hobby? Have you heard that will question when you got scholars? We believe that that concern was given by teacher on their students. Many kinds of hobby, All people has different hobby. And you know that little person similar to reading or as reading through become their hobby. You need to know that reading is very important as well as book as to be the matter. Book is important thing to increase you knowledge, except your current teacher or lecturer. You get good news or update about something by book. Amount types of books that can you choose to use be your object. One of them is niagra An Ultralight Helicopter Experience: The History, The Theory, The Design, The Build, The Testing.
