Automation Based Creative Design - Research and Perspectives

Automation Based Creative Design - Research and Perspectives

Computer technology has revolutionized many aspects of building design, such as drafting, management, construction - even building with robots. This revolution has expanded into the field of design creativity. Presented in this book is an up-to-date, comprehensive picture of research advances in the fast-growing field of informatics applied to conceptual stages in the generation of artifacts - in particular, buildings. It addresses the question how far and in what ways creative design can be intelligently automated.

Among the topics covered are: the use of precedents; the relations between case-based, rule-based, and principle-based architectural design reasoning; product typology; artifact thesauruses; the inputting and retrieval of architectural knowledge; the visual representation and understanding of existing or projected built forms; empirical and analytical models of the design process and the design product; desktop design toolkits; grammars of shape and of function; multiple-perspective building data structures; design as a multi-agent collaborative process; the integration of heterogeneous engineering information; and foundations for a systematic approach to the development of knowledge-based design systems.

The papers provide a link between basic and practical issues: - fundamental questions in the theory of artifact design, artificial intelligence, and the cognitive science of imagination and reasoning; - problems in the computerization of building data and design facilities; - the practical tasks of building conception, construction and evaluation. The automation of creative design is itself considered as an engineering design problem.

The implications of current and future work for architectural education and research in architectural history, as well as for computer-integrated construction and the management of engineering projects are considered.

From reader reviews:

Elliot Weber:

Here thing why that Automation Based Creative Design - Research and Perspectives are different and reliable to be yours. First of all studying a book is good but it really depends in the content from it which is the content is as yummy as food or not. Automation Based Creative Design - Research and Perspectives giving you information deeper as different ways, you can find any guide out there but there is no publication that similar with Automation Based Creative Design - Research and Perspectives. It gives you thrill reading journey, its open up your eyes about the thing this happened in the world which is possibly can be happened around you. It is easy to bring everywhere like in park, café, or even in your means home by train. If you are having difficulties in bringing the published book maybe the form of Automation Based Creative Design - Research and Perspectives in e-book can be your option.

Carolyn Rolon:

Now a day folks who Living in the era wherever everything reachable by talk with the internet and the resources within it can be true or not need people to be aware of each details they get. How individuals to be smart in having any information nowadays? Of course the answer then is reading a book. Studying a book can help men and women out of this uncertainty Information mainly this Automation Based Creative Design - Research and Perspectives book because book offers you rich information and knowledge. Of course the details in this book hundred pct guarantees there is no doubt in it everbody knows.

Lynn Groff:

Reading a publication can be one of a lot of pastime that everyone in the world really likes. Do you like reading book so. There are a lot of reasons why people like it. First reading a guide will give you a lot of new facts. When you read a publication you will get new information mainly because book is one of numerous ways to share the information or even their idea. Second, studying a book will make you actually more imaginative. When you studying a book especially tale fantasy book the author will bring you to definitely imagine the story how the personas do it anything. Third, you could share your knowledge to other individuals. When you read this Automation Based Creative Design - Research and Perspectives, you are able to tells your family, friends and soon about yours reserve. Your knowledge can inspire different ones, make them reading a publication.

Henry Jones:

Do you like reading a publication? Confuse to looking for your preferred book? Or your book was rare? Why so many concern for the book? But virtually any people feel that they enjoy to get reading. Some people likes reading through, not only science book but additionally novel and Automation Based Creative Design - Research and Perspectives or others sources were given information for you. After you know how the good a book, you feel desire to read more and more. Science e-book was created for teacher or students especially. Those guides are helping them to increase their knowledge. In additional case, beside science guide, any

other book likes Automation Based Creative Design - Research and Perspectives to make your spare time considerably more colorful. Many types of book like here.
