## **Radiocarbon Dating, Second Edition: An Archaeological Perspective** R.E. Taylor, Ofer Bar-Yosef

This volume is a major revision and expansion of Taylor's seminal book *Radiocarbon Dating: An Archaeological Perspective*. It covers the major advances and accomplishments of the  $^{14}\text{C}$  method in archaeology and analyzes factors that affect the accuracy and precision of  $^{14}\text{C}$ -based age estimates. In addition to reviewing the basic principles of the method, it examines  $^{14}\text{C}$  dating anomalies and means to resolve them, and considers the critical application of  $^{14}\text{C}$  data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology. This volume, again a benchmark for  $^{14}\text{C}$  dating, critically reflects on the method and data that underpins, in so many cases, the validity of the chronologies used to understand the prehistoric archaeological record.
