The Development of Propulsion Technology for U.S. Space-Launch Vehicles, 1926-1991 (Centennial of Flight Series) J. D. Hunley

In this definitive study, J. D. Hunley traces the program's development from Goddard's early rockets (and the German V-2 missile) through the Titan IVA and the Space Shuttle, with a focus on space-launch vehicles. Since these rockets often evolved from early missiles, he pays considerable attention to missile technology, not as an end in itself, but as a contributor to launch-vehicle technology.

Focusing especially on the engineering culture of the program, Hunley communicates this very human side of technological development by means of anecdotes, character sketches, and case studies of problems faced by rocket engineers. He shows how such a highly adaptive approach enabled the evolution of a hugely complicated technology that was impressive—but decidedly not rocket science.

Unique in its single-volume coverage of the evolution of launch-vehicle technology from 1926 to 1991, this meticulously researched work will inform scholars and engineers interested in the history of technology and innovation, as well as those specializing in the history of space flight.

From reader reviews:

Richard Redd:

This The Development of Propulsion Technology for U.S. Space-Launch Vehicles, 1926-1991 (Centennial of Flight Series) tend to be reliable for you who want to become a successful person, why. The main reason of this The Development of Propulsion Technology for U.S. Space-Launch Vehicles, 1926-1991 (Centennial of Flight Series) can be one of many great books you must have is actually giving you more than just simple reading food but feed you with information that maybe will shock your before knowledge. This book is handy, you can bring it just about everywhere and whenever your conditions at e-book and printed versions. Beside that this The Development of Propulsion Technology for U.S. Space-Launch Vehicles, 1926-1991 (Centennial of Flight Series) forcing you to have an enormous of experience such as rich vocabulary, giving you test of critical thinking that we all know it useful in your day exercise. So , let's have it and luxuriate in reading.

Charles Denzer:

Your reading sixth sense will not betray a person, why because this The Development of Propulsion Technology for U.S. Space-Launch Vehicles, 1926-1991 (Centennial of Flight Series) publication written by well-known writer who knows well how to make book that can be understand by anyone who have read the book. Written throughout good manner for you, leaking every ideas and creating skill only for eliminate your current hunger then you still uncertainty The Development of Propulsion Technology for U.S. Space-Launch Vehicles, 1926-1991 (Centennial of Flight Series) as good book not simply by the cover but also by the content. This is one guide that can break don't evaluate book by its handle, so do you still needing another sixth sense to pick this!?! Oh come on your looking at sixth sense already said so why you have to listening to an additional sixth sense.

Jennifer Fields:

This The Development of Propulsion Technology for U.S. Space-Launch Vehicles, 1926-1991 (Centennial of Flight Series) is great guide for you because the content that is full of information for you who always deal with world and get to make decision every minute. That book reveal it details accurately using great organize word or we can claim no rambling sentences in it. So if you are read it hurriedly you can have whole facts in it. Doesn't mean it only will give you straight forward sentences but challenging core information with wonderful delivering sentences. Having The Development of Propulsion Technology for U.S. Space-Launch Vehicles, 1926-1991 (Centennial of Flight Series) in your hand like obtaining the world in your arm, data in it is not ridiculous one particular. We can say that no book that offer you world inside ten or fifteen moment right but this book already do that. So , this is certainly good reading book. Heya Mr. and Mrs. hectic do you still doubt that?

Jennifer Crawford:

Is it a person who having spare time in that case spend it whole day by simply watching television programs or just lying on the bed? Do you need something new? This The Development of Propulsion Technology for U.S. Space-Launch Vehicles, 1926-1991 (Centennial of Flight Series) can be the solution, oh how comes? It's a book you know. You are therefore out of date, spending your time by reading in this brand new era is common not a geek activity. So what these textbooks have than the others?
