Bayesian Missing Data Problems: EM, Data Augmentation and Noniterative Computation (Chapman & Hall/CRC Biostatistics Series) Ming T. Tan, Guo-Liang Tian, Kai Wang Ng

Bayesian Missing Data Problems: EM, Data Augmentation and Noniterative Computation presents solutions to missing data problems through explicit or noniterative sampling calculation of Bayesian posteriors. The methods are based on the inverse Bayes formulae discovered by one of the author in 1995. Applying the Bayesian approach to important real-world problems, the authors focus on exact numerical solutions, a conditional sampling approach via data augmentation, and a noniterative sampling approach via EM-type algorithms.

After introducing the missing data problems, Bayesian approach, and posterior computation, the book succinctly describes EM-type algorithms, Monte Carlo simulation, numerical techniques, and optimization methods. It then gives exact posterior solutions for problems, such as nonresponses in surveys and cross-over trials with missing values. It also provides noniterative posterior sampling solutions for problems, such as contingency tables with supplemental margins, aggregated responses in surveys, zero-inflated Poisson, capture-recapture models, mixed effects models, right-censored regression model, and constrained parameter models. The text concludes with a discussion on compatibility, a fundamental issue in Bayesian inference.

This book offers a unified treatment of an array of statistical problems that involve missing data and constrained parameters. It shows how Bayesian procedures can be useful in solving these problems.

From reader reviews:

Tony Sanford:

Information is provisions for anyone to get better life, information today can get by anyone in everywhere. The information can be a know-how or any news even an issue. What people must be consider while those information which is inside the former life are hard to be find than now could be taking seriously which one would work to believe or which one typically the resource are convinced. If you get the unstable resource then you understand it as your main information you will see huge disadvantage for you. All of those possibilities will not happen inside you if you take Bayesian Missing Data Problems: EM, Data Augmentation and Noniterative Computation (Chapman & Hall/CRC Biostatistics Series) as your daily resource information.

Dianna Chrisman:

Reading can called brain hangout, why? Because if you are reading a book particularly book entitled Bayesian Missing Data Problems: EM, Data Augmentation and Noniterative Computation (Chapman & Hall/CRC Biostatistics Series) your mind will drift away trough every dimension, wandering in each aspect that maybe mysterious for but surely will become your mind friends. Imaging each word written in a book then become one web form conclusion and explanation this maybe you never get prior to. The Bayesian Missing Data Problems: EM, Data Augmentation and Noniterative Computation (Chapman & Hall/CRC Biostatistics Series) giving you one more experience more than blown away your thoughts but also giving you useful details for your better life within this era. So now let us present to you the relaxing pattern here is your body and mind will probably be pleased when you are finished looking at it, like winning a sport. Do you want to try this extraordinary shelling out spare time activity?

Ricky Bradley:

Beside this particular Bayesian Missing Data Problems: EM, Data Augmentation and Noniterative Computation (Chapman & Hall/CRC Biostatistics Series) in your phone, it could possibly give you a way to get more close to the new knowledge or details. The information and the knowledge you may got here is fresh from the oven so don't always be worry if you feel like an old people live in narrow community. It is good thing to have Bayesian Missing Data Problems: EM, Data Augmentation and Noniterative Computation (Chapman & Hall/CRC Biostatistics Series) because this book offers to your account readable information. Do you sometimes have book but you don't get what it's interesting features of. Oh come on, that would not happen if you have this in your hand. The Enjoyable arrangement here cannot be questionable, including treasuring beautiful island. Use you still want to miss that? Find this book as well as read it from currently!

Guadalupe McCoy:

E-book is one of source of information. We can add our knowledge from it. Not only for students and also native or citizen require book to know the up-date information of year to be able to year. As we know those textbooks have many advantages. Beside all of us add our knowledge, can also bring us to around the world. By the book Bayesian Missing Data Problems: EM, Data Augmentation and Noniterative Computation (Chapman & Hall/CRC Biostatistics Series) we can take more advantage. Don't someone to be creative people? Being creative person must choose to read a book. Simply choose the best book that suitable with your aim. Don't possibly be doubt to change your life at this book Bayesian Missing Data Problems: EM, Data Augmentation and Noniterative Computation (Chapman & Hall/CRC Biostatistics Series). You can more pleasing than now.
