## **HUMIRA (Adalimumab): Treats Arthritis, Plaque Psoriasis, Ankylosing Spondylitis, Crohn Disease, and Ulcerative Colitis** James Lee Anderson

“Although, your health condition may impact your everyday life, do not let it define who you are.”

HUMIRA (Adalimumab injection) is used to treat the symptoms and prevent the progression of active rheumatoid arthritis and ankylosing spondylitis. It is used in children 2 years of age and older for juvenile idiopathic arthritis. This medicine is also used to treat psoriatic arthritis, which is a type of arthritis that causes pain and swelling in the joints along with patches of scaly skin on some areas of the body. Psoriatic arthritis usually occurs with a skin condition called psoriasis. HUMIRA may be used alone or in combination with medicines such as methotrexate. HUMIRA is also used to treat the symptoms of active Crohn's disease in patients who have not been helped by other medicines, such as infliximab. It is also used to treat moderate to moderate to severe ulcerative colitis in patients who have been treated with other medicines (eg, azathioprine, corticosteroids, or 6-mercaptopurine) that did not work well. HUMIRA may also be used to treat chronic plaque psoriasis, which is a skin disease with red patches and white scales that don't go away. Thanks and may you have a good understanding about this drug— HUMIRA (Adalimumab injection). You may want to share this book with your family and friends who may be in need of help and would want to use this medicine. Take care, and as always, be well!
