**Emergency and Continuous Exposure Guidance Levels for Selected Submarine Contaminants** National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Toxicology, Subcommittee on Emergency and Continuous Exposure Guidance Levels for Selected Submarine Contaminants

U.S. Navy personnel who work on submarines are in an enclosed and isolated environment for days or weeks at a time when at sea. Unlike a typical work environment, they are potentially exposed to air contaminants 24 hours a day. To protect workers from potential adverse health effects due to those conditions, the U.S. Navy has established exposure guidance levels for a number of contaminants. The Navy asked a subcommittee of the National Research Council (NRC) to review, and develop when necessary, exposure guidance levels for 10 contaminants.

Overall, the subcommittee found the values proposed by the Navy to be suitable for protecting human health. For a few chemicals, the committee proposed levels that were lower than those proposed by the Navy. In conducting its evaluation, the subcommittee found that there is little exposure data available on the submarine environment and echoed a previous recommendation from an earlier NRC report to conduct monitoring that would provide a complete analysis of submarine air and data on exposure of personnel to contaminants.

**From reader reviews:**

**Kathryn Cannon:**

The book Emergency and Continuous Exposure Guidance Levels for Selected Submarine Contaminants can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the good thing like a book Emergency and Continuous Exposure Guidance Levels for Selected Submarine Contaminants? Some of you have a different opinion about guide. But one aim this book can give many data for us. It is absolutely appropriate. Right now, try to closer with the book. Knowledge or data that you take for that, it is possible to give for each other; you could share all of these. Book Emergency and Continuous Exposure Guidance Levels for Selected Submarine Contaminants has simple shape but the truth is know: it has great and large function for you. You can appear the enormous world by open up and read a reserve. So it is very wonderful.

**Elida Allman:**

Book is to be different for every single grade. Book for children until eventually adult are different content. We all know that that book is very important for all of us. The book Emergency and Continuous Exposure Guidance Levels for Selected Submarine Contaminants seemed to be making you to know about other understanding and of course you can take more information. It is extremely advantages for you. The e-book Emergency and Continuous Exposure Guidance Levels for Selected Submarine Contaminants is not only giving you much more new information but also to be your friend when you sense bored. You can spend your own spend time to read your reserve. Try to make relationship together with the book Emergency and Continuous Exposure Guidance Levels for Selected Submarine Contaminants. You never experience lose out for everything in the event you read some books.

**Sheila Lefevre:**

Can you one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Try to pick one book that you just dont know the inside because don't judge book by its protect may doesn't work here is difficult job because you are afraid that the inside maybe not since fantastic as in the outside look likes. Maybe you answer can be Emergency and Continuous Exposure Guidance Levels for Selected Submarine Contaminants why because the amazing cover that make you consider about the content will not disappoint you. The inside or content is usually fantastic as the outside or even cover. Your reading 6th sense will directly make suggestions to pick up this book.

**Randy Gable:**

A lot of book has printed but it differs. You can get it by net on social media. You can choose the top book for you, science, comedy, novel, or whatever through searching from it. It is named of book Emergency and

Continuous Exposure Guidance Levels for Selected Submarine Contaminants. You'll be able to your knowledge by it. Without causing the printed book, it could add your knowledge and make a person happier to read. It is most crucial that, you must aware about reserve. It can bring you from one destination for a other place.
