At School (Mathematics Readers) Aubrie Nielsen

Learn the basics of nonstandard measurement at school! This book shows young readers that they can measure the length, width, and weight of all kinds of school supplies with nonstandard measurements. A flute is six cubes long! A desk is four hands wide! A ball weighs five blocks! These fun measurement examples, along with engaging "You Try It!" problems, will encourage children to practice measuring their own school supplies and will improve their understanding of early STEM themes.

About Shell Education

Rachelle Cracchiolo started the company with a friend and fellow teacher. Both were eager to share their ideas and passion for education with other classroom leaders. What began as a hobby, selling lesson plans to local stores, became a part-time job after a full day of teaching, and eventually blossomed into Teacher Created Materials. The story continued in 2004 with the launch of Shell Education and the introduction of professional resources and classroom application books designed to support Teacher Created Materials curriculum resources. Today, Teacher Created Materials and Shell Education are two of the most recognized names in educational publishing around the world.
