Nets, Puzzles, and Postmen: An Exploration of Mathematical Connections

Peter M Higgins

Nets, Puzzles, and Postmen: An Exploration of Mathematical Connections Peter M Higgins

What do road and railway systems, mingling at parties, mazes, family trees, and the internet all have in common? All are networks--either people or places or things that relate and connect to one another. In this lively and fun look at the mathematics of networks, Peter Higgins shows that these phenomena--and many more--all share the same deep mathematical structure. Filled with puzzles and other curious mathematical conundrums, this stimulating book offers new insights into such familiar mathematical quandaries as the four-color map, the bridges of Konigsberg, and the Postman Problem (what is the most efficient way of delivering your letters, so you get back to your starting point without having traversed any street twice). Only relatively recently have mathematicians begun to explore networks and connections, and their importance has taken everyone by surprise. *Nets, Puzzles, and Postmen* takes readers on a dazzling tour of this new field, in a book that will delight math buffs everywhere.

From reader reviews:

Danny Whittemore:

A lot of people always spent all their free time to vacation or go to the outside with them friends and family or their friend. Did you know? Many a lot of people spent that they free time just watching TV, or even playing video games all day long. If you wish to try to find a new activity that is look different you can read a new book. It is really fun for yourself. If you enjoy the book that you just read you can spent 24 hours a day to reading a e-book. The book Nets, Puzzles, and Postmen: An Exploration of Mathematical Connections it doesn't matter what good to read. There are a lot of folks that recommended this book. They were enjoying reading this book. If you did not have enough space to bring this book you can buy the e-book. You can m0ore quickly to read this book out of your smart phone. The price is not too expensive but this book has high quality.

Ellis Cook:

This Nets, Puzzles, and Postmen: An Exploration of Mathematical Connections is great guide for you because the content which is full of information for you who else always deal with world and get to make decision every minute. This specific book reveal it information accurately using great organize word or we can declare no rambling sentences inside. So if you are read this hurriedly you can have whole details in it. Doesn't mean it only will give you straight forward sentences but difficult core information with lovely delivering sentences. Having Nets, Puzzles, and Postmen: An Exploration of Mathematical Connections in your hand like having the world in your arm, information in it is not ridiculous a single. We can say that no reserve that offer you world within ten or fifteen moment right but this book already do that. So , this can be good reading book. Hello Mr. and Mrs. busy do you still doubt this?

Randy Scott:

You can obtain this Nets, Puzzles, and Postmen: An Exploration of Mathematical Connections by go to the bookstore or Mall. Only viewing or reviewing it can to be your solve issue if you get difficulties for ones knowledge. Kinds of this reserve are various. Not only by means of written or printed but also can you enjoy this book by means of e-book. In the modern era just like now, you just looking by your local mobile phone and searching what their problem. Right now, choose your ways to get more information about your guide. It is most important to arrange you to ultimately make your knowledge are still revise. Let's try to choose correct ways for you.

Richard Russell:

E-book is one of source of expertise. We can add our expertise from it. Not only for students but native or citizen need book to know the upgrade information of year to year. As we know those books have many advantages. Beside many of us add our knowledge, can bring us to around the world. By book Nets, Puzzles, and Postmen: An Exploration of Mathematical Connections we can get more advantage. Don't you to

definitely be creative people? Being creative person must love to read a book. Just simply choose the best book that suitable with your aim. Don't possibly be doubt to change your life at this book Nets, Puzzles, and Postmen: An Exploration of Mathematical Connections. You can more desirable than now.
