Single Parents By Choice Naomi Miller

With almost one child in four currently living with a single parent, one-parent families have become a significant and growing presence in America today. Naomi Miller, Ph.D., a clinician and expert in family relations, looks at a new and emerging group of single parents, namely, those who, not unlike couples, came to their decision for single parenthood intentionally. In contrast to teenage mothers, these men and women are, for the most part, older, educated, professionally successful, and financially secure. By offering relevant demographic, research, and sociocultural data, as well as a series of intensely personal and revealing interviews, *Single Parents by Choice* investigates what led these people to make such a decision.
