North American Agroforestry: An Integrated Science and Practice H.E. Garrett, W.J. Rietveld, R.F. Fisher

Because of the environmental consequences of past agricultural and forestry practices that focused exclusively on the economic bottom line, the public now demands greater accountability and the application of more ecologically and socially friendly management approaches. Introductory chapters focus on the ecological foundations and the current status of agroforestry. Additional chapters cover technical aspects of major agroforestry practices: windbreaks, silvopastures, alley cropping, riparian forest buffers, and forest farming. The book concludes with several chapters that evaluate these systems, integrate related socioeconomic factors, and explore the future.

Also available:

A Spectrum of Achievement in Agronomy: Women Fellows of the Tri-Societies - ISBN 0891181458

Stubble Over the Soil: The Vital Role of Plant Residue in Soil Management to Improve Soil Quality - ISBN 0891181318

Roots and Soil Management: Interactions between Roots and the Soil - ISBN 0891181598

The American Society of Agronomy, Crop Science Society of America, and Soil Science Society of America are prominent international scientific societies headquartered in Madison, Wisconsin. The Societies specialize in peer-reviewed, high-quality science titles for a wide variety of audiences.

Some of the many areas we publish in include:

- Soils Methods and Management
- Crop Development and Improvement
- Agrosystem Management and the Global Food Crisis
- Environmental Conservation and Climatology
