## Content-Based Audio Classification and Retrieval for Audiovisual Data Parsing (The Springer International Series in Engineering and Computer Science) Tong Zhang, C.C. Jay Kuo

Content-Based Audio Classification and Retrieval for Audiovisual Data Parsing is an up-to-date overview of audio and video content analysis. Included is extensive treatment of audiovisual data segmentation, indexing and retrieval based on multimodal media content analysis, and content-based management of audio data. In addition to the commonly studied audio types such as speech and music, the authors have included hybrid types of sounds that contain more than one kind of audio component such as speech or environmental sound with music in the background. Emphasis is also placed on semantic-level identification and classification of environmental sounds. The authors introduce a new generic audio retrieval system on top of the audio archiving schemes. Both theoretical analysis and implementation issues are presented. The developing MPEG-7 standards are explored.

Content-Based Audio Classification and Retrieval for Audiovisual Data Parsing will be especially useful to researchers and graduate level students designing and developing fully functional audiovisual systems for audio/video content parsing of multimedia streams.

#### From reader reviews:

### Michael Trejo:

Reading can called mind hangout, why? Because if you find yourself reading a book especially book entitled Content-Based Audio Classification and Retrieval for Audiovisual Data Parsing (The Springer International Series in Engineering and Computer Science) your brain will drift away trough every dimension, wandering in each aspect that maybe unidentified for but surely can become your mind friends. Imaging each word written in a e-book then become one type conclusion and explanation that maybe you never get before. The Content-Based Audio Classification and Retrieval for Audiovisual Data Parsing (The Springer International Series in Engineering and Computer Science) giving you a different experience more than blown away your brain but also giving you useful info for your better life within this era. So now let us explain to you the relaxing pattern here is your body and mind will be pleased when you are finished reading through it, like winning a. Do you want to try this extraordinary shelling out spare time activity?

#### Rebecca Stark:

This Content-Based Audio Classification and Retrieval for Audiovisual Data Parsing (The Springer International Series in Engineering and Computer Science) is brand-new way for you who has curiosity to look for some information because it relief your hunger details. Getting deeper you in it getting knowledge more you know or perhaps you who still having small amount of digest in reading this Content-Based Audio Classification and Retrieval for Audiovisual Data Parsing (The Springer International Series in Engineering and Computer Science) can be the light food for you personally because the information inside this particular book is easy to get by means of anyone. These books produce itself in the form that is reachable by anyone, yep I mean in the e-book type. People who think that in guide form make them feel tired even dizzy this book is the answer. So there is not any in reading a reserve especially this one. You can find what you are looking for. It should be here for you. So , don't miss it! Just read this e-book type for your better life along with knowledge.

#### **Thomas Moss:**

On this era which is the greater individual or who has ability in doing something more are more valuable than other. Do you want to become one among it? It is just simple approach to have that. What you have to do is just spending your time not much but quite enough to possess a look at some books. One of many books in the top record in your reading list is actually Content-Based Audio Classification and Retrieval for Audiovisual Data Parsing (The Springer International Series in Engineering and Computer Science). This book that is certainly qualified as The Hungry Inclines can get you closer in becoming precious person. By looking upwards and review this guide you can get many advantages.

### **Kathy Ahmed:**

E-book is one of source of knowledge. We can add our knowledge from it. Not only for students but native or citizen will need book to know the revise information of year to help year. As we know those books have many advantages. Beside we all add our knowledge, can bring us to around the world. With the book Content-Based Audio Classification and Retrieval for Audiovisual Data Parsing (The Springer International Series in Engineering and Computer Science) we can acquire more advantage. Don't you to be creative people? To be creative person must want to read a book. Just choose the best book that suitable with your aim. Don't always be doubt to change your life with this book Content-Based Audio Classification and Retrieval for Audiovisual Data Parsing (The Springer International Series in Engineering and Computer Science). You can more desirable than now.
