L.V. Kantorovich

Descriptive Theory of Sets and Functions. Functional Analysis in Semi-ordered Spaces (Classics of Soviet Mathematics) (Pt. 1) L.V. Kantorovich

Kantorovich, the late Nobel Laureate, was a respected mathematical economist, and one of the founding fathers of linear programming. Part I begins with chapters on the theory of sets and real functions. Topics treated include universal functions, W.H. Young's classification, generalized derivatives of continuous functions and the H. Steinhaus problem. The book also includes papers on the theory of projective sets, general and particular methods of the extension of Hilbert space, and linear semi-ordered spaces. The author deals with a number of approximate calculations and solutions including a discussion of an approximate calculation of certain types of definite integrals, and also a method for the approximate solution of partial differential equations. In addition to this, the author looks at various other methods, including the Ritz method, the Galerkin method in relation to the reduction of differential equations and the Newton methods for functional equations. Towards the end of the book there are several chapters on computers.

From reader reviews:

Gary Gonzales:

This Descriptive Theory of Sets and Functions. Functional Analysis in Semi-ordered Spaces (Classics of Soviet Mathematics) (Pt. 1) book is just not ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is usually information inside this guide incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This particular Descriptive Theory of Sets and Functions. Functional Analysis in Semi-ordered Spaces (Classics of Soviet Mathematics) (Pt. 1) without we know teach the one who reading through it become critical in pondering and analyzing. Don't be worry Descriptive Theory of Sets and Functions. Functional Analysis in Semi-ordered Spaces (Classics of Soviet Mathematics) (Pt. 1) can bring whenever you are and not make your carrier space or bookshelves' turn out to be full because you can have it within your lovely laptop even cell phone. This Descriptive Theory of Sets and Functions. Functional Analysis in Semi-ordered Spaces (Classics of Soviet Mathematics) (Pt. 1) having great arrangement in word as well as layout, so you will not experience uninterested in reading.

Michelle Jennings:

The book Descriptive Theory of Sets and Functions. Functional Analysis in Semi-ordered Spaces (Classics of Soviet Mathematics) (Pt. 1) will bring that you the new experience of reading any book. The author style to spell out the idea is very unique. Should you try to find new book to learn, this book very suitable to you. The book Descriptive Theory of Sets and Functions. Functional Analysis in Semi-ordered Spaces (Classics of Soviet Mathematics) (Pt. 1) is much recommended to you to study. You can also get the e-book through the official web site, so you can more easily to read the book.

David Fern:

Is it an individual who having spare time in that case spend it whole day by means of watching television programs or just resting on the bed? Do you need something totally new? This Descriptive Theory of Sets and Functions. Functional Analysis in Semi-ordered Spaces (Classics of Soviet Mathematics) (Pt. 1) can be the respond to, oh how comes? It's a book you know. You are so out of date, spending your spare time by reading in this new era is common not a geek activity. So what these textbooks have than the others?

John Stewart:

Don't be worry when you are afraid that this book can filled the space in your house, you will get it in e-book technique, more simple and reachable. This Descriptive Theory of Sets and Functions. Functional Analysis in Semi-ordered Spaces (Classics of Soviet Mathematics) (Pt. 1) can give you a lot of friends because by you taking a look at this one book you have factor that they don't and make anyone more like an interesting person. This particular book can be one of one step for you to get success. This publication offer you information that possibly your friend doesn't understand, by knowing more than additional make you to be

great individuals. So , why hesitate? Let me have Descriptive Theory of Sets and Functions. Functional Analysis in Semi-ordered Spaces (Classics of Soviet Mathematics) (Pt. 1).
