**Lunar and Planetary Cartography in Russia (Astrophysics and Space Science Library)** Vladislav Shevchenko, Zhanna Rodionova, Gregory Michael

This book is the first to document in depth the history of lunar and planetary cartography in Russia. The first map of the far side of the Moon was made with the participation of Lomonosov Moscow University (Sternberg Astronomical Institute, MSU) in 1960. The developed mapping technologies were then used in preparing the “Complete Map of the Moon” in 1967 as well as other maps and globes. Over the years, various maps of Mars have emerged from the special course “Mapping of extraterrestrial objects” in the MSU Geography Department, including the hypsometric map of Mars at a scale of 1:26,000,000, compiled by J.A. Ilyukhina and published in 2004 in an edition of 5,000 copies. A more detailed version of this map has since been produced with a new hypsometric scale. In addition, maps of the northern and southern hemispheres of Mars have been compiled for the hypsometric globe of Mars. Relief maps of Venus were made in 2008, 2010, and 2011, and hypsometric maps of Phobos and Deimos at a scale of 1:60,000 were published in 2011. History of Lunar and Planetary Cartography in Russia provides detailed information on the compilation of this diverse range of maps and will be of interest to all lunar and planetary cartographers.

### **From reader reviews:**

#### **Teresa Dillard:**

Book is to be different per grade. Book for children until finally adult are different content. As you may know that book is very important normally. The book Lunar and Planetary Cartography in Russia (Astrophysics and Space Science Library) had been making you to know about other expertise and of course you can take more information. It doesn't matter what advantages for you. The book Lunar and Planetary Cartography in Russia (Astrophysics and Space Science Library) is not only giving you far more new information but also to become your friend when you experience bored. You can spend your current spend time to read your publication. Try to make relationship using the book Lunar and Planetary Cartography in Russia (Astrophysics and Space Science Library). You never really feel lose out for everything if you read some books.

#### **Jennifer Mitchell:**

Now a day people who Living in the era where everything reachable by connect to the internet and the resources within it can be true or not call for people to be aware of each information they get. How many people to be smart in getting any information nowadays? Of course the reply is reading a book. Reading a book can help persons out of this uncertainty Information especially this Lunar and Planetary Cartography in Russia (Astrophysics and Space Science Library) book since this book offers you rich info and knowledge. Of course the info in this book hundred pct guarantees there is no doubt in it you probably know this.

#### **Chantal Dow:**

Spent a free a chance to be fun activity to try and do! A lot of people spent their sparetime with their family, or their friends. Usually they performing activity like watching television, planning to beach, or picnic from the park. They actually doing same thing every week. Do you feel it? Do you wish to something different to fill your free time/ holiday? May be reading a book might be option to fill your totally free time/ holiday. The first thing that you will ask may be what kinds of e-book that you should read. If you want to consider look for book, may be the reserve untitled Lunar and Planetary Cartography in Russia (Astrophysics and Space Science Library) can be very good book to read. May be it may be best activity to you.

#### **James Shockley:**

As a pupil exactly feel bored to be able to reading. If their teacher inquired them to go to the library or even make summary for some publication, they are complained. Just minor students that has reading's soul or real their passion. They just do what the educator want, like asked to the library. They go to presently there but nothing reading very seriously. Any students feel that studying is not important, boring and also can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Lunar and Planetary Cartography in Russia (Astrophysics and Space

Science Library) can make you truly feel more interested to read.
