Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130) N. S. Robins

The primary groundwater management issue in many countries today is pollution. This may derive from a point source, perhaps a leaking solvent store at a factory, or it may be diffuse, such as the threat posed by the use of agricultural fertilisers and pesticides. The key to understanding the transport of a pollutant from the ground surface or near surface into an aquifer is an understanding of recharge. In turn, this allows the vulnerability of aquifers to pollution to be classified and appropriate landzones to be defined. Land zonation of different classes of aquifer vulnerability is a valuable tool for management and planning. In this volume the recent developments within the interlinked areas of groundwater pollution, aquifer recharge and vulnerability are highlighted. The book provides an up-to-date description of the relationship between pollution, recharge and vulnerability set against the current groundwater protection policies of the UK and Republic of Ireland. It also provides keynote overviews for each topic.

Also available:

Sustainable Groundwater Development (Geological Society Special Publication) - ISBN 1862390975
Climate Change and Groundwater - Special Publication no 288 - ISBN 1862392358

The Geological Society of London

Founded in 1807, the Geological Society of London is the oldest geological society in the world, and one of the largest publishers in the Earth sciences.

The Society publishes a wide range of high-quality peer-reviewed titles for academics and professionals working in the geosciences, and enjoys an enviable international reputation for the quality of its work.

The many areas in which we publish in include:

- Petroleum geology
- Tectonics, structural geology and geodynamics
- Stratigraphy, sedimentology and paleontology
- Volcanology, magmatic studies and geochemistry
- Remote sensing
- History of geology
- Regional geology guides

From reader reviews:

Armando Ceballos:

Book is definitely written, printed, or highlighted for everything. You can recognize everything you want by a book. Book has a different type. As it is known to us that book is important matter to bring us around the world. Adjacent to that you can your reading proficiency was fluently. A guide Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130) will make you to become smarter. You can feel a lot more confidence if you can know about every little thing. But some of you think which open or reading some sort of book make you bored. It isn't make you fun. Why they might be thought like that? Have you in search of best book or suited book with you?

Nathan Herr:

Would you one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Aim to pick one book that you find out the inside because don't judge book by its cover may doesn't work is difficult job because you are frightened that the inside maybe not since fantastic as in the outside seem likes. Maybe you answer may be Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130) why because the fantastic cover that make you consider with regards to the content will not disappoint a person. The inside or content is actually fantastic as the outside or perhaps cover. Your reading 6th sense will directly assist you to pick up this book.

Daniel Hartung:

A lot of e-book has printed but it differs from the others. You can get it by world wide web on social media. You can choose the most effective book for you, science, comic, novel, or whatever through searching from it. It is identified as of book Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130). You can add your knowledge by it. Without making the printed book, it might add your knowledge and make anyone happier to read. It is most essential that, you must aware about guide. It can bring you from one location to other place.

Eldon Hall:

What is your hobby? Have you heard which question when you got college students? We believe that that query was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person such as reading or as reading through become their hobby. You should know that reading is very important along with book as to be the thing. Book is important thing to increase you knowledge, except your personal teacher or lecturer. You get good news or update regarding something by book. Amount types of books that can you go onto be your object. One of them are these claims Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130).
