A Dynamic Bottleneck-oriented Manufacturing Control System Huaxin Liu

Dynamic Bottleneck-oriented Manufacturing Control (DBNO) is a hybrid manufacturing control system focusing on discrete manufacturing systems with routing flexibility in a Make-To-Order environment. It has been developed for the simultaneous achievement of conflicting logistic objectives, such as short throughput time, low WIP, high schedule reliability and high output rate, while effectively coping with production disturbances, including internal disturbance and external disturbance. In order to verify the DBNO, discrete simulation experiments are conducted by using industrial data from a German manufacturer and the results are then comprehensively assessed. This is done by comparing it with well-known existing control methods including Constant WIP control, Load-oriented order release and Autonomous Control. Multiple key logistic performance measures are also considered in this assessment. The simulation results indicate that the proposed DBNO is both an effective and efficient manufacturing control system for simultaneously achieving the conflicting logistic objectives. Moreover it contains also immense potential for coping with production disturbances.

From reader reviews:

John Champlin:

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite publication and reading a publication. Beside you can solve your trouble; you can add your knowledge by the guide entitled A Dynamic Bottleneck-oriented Manufacturing Control System. Try to the actual book A Dynamic Bottleneck-oriented Manufacturing Control System as your friend. It means that it can to become your friend when you truly feel alone and beside regarding course make you smarter than ever before. Yeah, it is very fortunated for you personally. The book makes you more confidence because you can know every thing by the book. So , let us make new experience as well as knowledge with this book.

Scott Settle:

Book is to be different per grade. Book for children until finally adult are different content. We all know that that book is very important for all of us. The book A Dynamic Bottleneck-oriented Manufacturing Control System seemed to be making you to know about other know-how and of course you can take more information. It is quite advantages for you. The book A Dynamic Bottleneck-oriented Manufacturing Control System is not only giving you much more new information but also for being your friend when you experience bored. You can spend your current spend time to read your e-book. Try to make relationship together with the book A Dynamic Bottleneck-oriented Manufacturing Control System. You never feel lose out for everything in the event you read some books.

Warren Bowers:

Now a day people who Living in the era just where everything reachable by connect with the internet and the resources included can be true or not need people to be aware of each details they get. How people have to be smart in having any information nowadays? Of course the answer is reading a book. Reading a book can help folks out of this uncertainty Information particularly this A Dynamic Bottleneck-oriented Manufacturing Control System book as this book offers you rich data and knowledge. Of course the info in this book hundred per cent guarantees there is no doubt in it you may already know.

Jason Buckley:

People live in this new day of lifestyle always try and and must have the extra time or they will get lot of stress from both way of life and work. So , when we ask do people have spare time, we will say absolutely indeed. People is human not really a huge robot. Then we request again, what kind of activity do you possess when the spare time coming to an individual of course your answer can unlimited right. Then ever try this one, reading books. It can be your alternative throughout spending your spare time, the actual book you have read will be A Dynamic Bottleneck-oriented Manufacturing Control System.
